1. Diversity

Diversity of Gains

At Sāvatthī.

“Mendicants, diversity of elements gives rise to diversity of perceptions. Diversity of perceptions gives rise to diversity of thoughts. Diversity of thoughts gives rise to diversity of contacts. Diversity of contacts gives rise to diversity of feelings. Diversity of feelings gives rise to diversity of desires. Diversity of desires gives rise to diversity of passions. Diversity of passions gives rise to diversity of searches. Diversity of searches gives rise to diversity of gains. And what is the diversity of elements? The sight element, the sound element, the smell element, the taste element, the touch element, and the idea element. This is called the diversity of elements.

And how does diversity of elements give rise to diversity of perceptions … diversity of searches give rise to diversity of gains?

The sight element gives rise to the perception of sights. The perception of sights gives rise to thoughts about sights. Thoughts about sights give rise to sight contact. Sight contact gives rise to feeling born of sight contact. Feeling born of sight contact gives rise to the desire for sights. The desire for sights gives rise to the passion for sights. The passion for sights gives rise to searching for sights. Searching for sights gives rise to gaining sights … The idea element gives rise to the perception of ideas. The perception of ideas gives rise to thoughts about ideas. Thoughts about ideas give rise to idea contact. Idea contact gives rise to feeling born of idea contact. Feeling born of idea contact gives rise to the desire for ideas. The desire for ideas gives rise to the passion for ideas. The passion for ideas gives rise to searching for ideas. Searching for ideas gives rise to gaining ideas.

That’s how diversity of elements gives rise to diversity of perceptions … diversity of searches gives rise to diversity of gains.”
